## Jeremy J. Thibodeaux

---

### Education

---

Ph.D. in Mathematics, University of Louisiana at Lafayette May 2007  
M.S. in Mathematics, University of Louisiana at Lafayette December 2004  
B.S. in Mathematics, University of Louisiana at Lafayette December 2002

---

### Professional Experience

---

Assistant Professor of Mathematics, Loyola University New Orleans, August 2010-present  
Assistant Professor of Mathematics, University of Central Oklahoma, August 2007-May 2010  
Teaching/Research Assistant, University of Louisiana at Lafayette, January 2003-May 2007

---

### Teaching

---

#### Courses Taught

Math A116: Survey of Calculus, Loyola University New Orleans  
Math A117: Concepts in College Algebra, Loyola University New Orleans  
Math A257: Calculus I, Loyola University New Orleans  
Math A258: Calculus II, Loyola University New Orleans  
Math A310: Introduction to Differential Equations, Loyola University New Orleans  
Math A494: Biomathematics, Loyola University New Orleans

Math A498: Richardson's Extrapolation, (Student research project), Loyola University New Orleans

Math 1453: College Algebra for Business, University of Central Oklahoma

Math 1513: College Algebra, University of Central Oklahoma

Math 2153: Bio-Calculus, University of Central Oklahoma

Math 2313: Calculus I, University of Central Oklahoma

Math 2323: Calculus II, University of Central Oklahoma

Math 2333: Calculus III, University of Central Oklahoma

Math 3103: Differential Equations, University of Central Oklahoma

Math 4910/5910: Partial Differential Equations, University of Central Oklahoma

Math 092: Elementary/Intermediate Algebra, University of Louisiana at Lafayette

Math 105: College Algebra, University of Louisiana at Lafayette

Math 201: Finite Mathematics, University of Louisiana at Lafayette

---

## Research

---

My research interests are in ordinary and partial differential equations, numerical analysis, and mathematical modeling of biological and social systems. My work thus far has been a blend of theoretical and computational investigations.

1. A.S. Ackleh, B. Ma, and J.J. Thibodeaux, A second-order high resolution finite difference scheme for a structured erythropoiesis model subject to malaria infection, submitted.
2. A.S. Ackleh and J.J. Thibodeaux, A second-order finite difference scheme for a mathematical model of erythropoiesis, in revision.
3. L. Birch, J. Thibodeaux, and R.P. Tucci, Zero divisor graphs of finite direct products of finite rings, submitted.

4. J.J. Thibodeaux and Timothy Schlittenhardt, Optimal treatment strategies for malaria infection, *Bulletin of Mathematical Biology*, 73, 2791-2808 (2011).
5. J.J. Thibodeaux, Modeling erythropoiesis subject to malaria infection, *Mathematical Biosciences*, 225, 59-67 (2010).
6. R. Scribner, A.S. Ackleh, B.G. Fitzpatrick, G. Jacquez, J.J. Thibodeaux, R. Rommel, N. Simonsen, A systems approach to college drinking: Development of a deterministic model for testing alcohol control policies, *Journal of Studies on Alcohol and Drugs*, 70, 805-821 (2009)
7. A.S. Ackleh, B.G. Fitzpatrick, R. Scribner, J.J. Thibodeaux, N. Simonsen, Ecosystems modeling of college drinking: Parameter estimation and comparing models to data, *Mathematical and Computer Modelling*, 50, 481-497 (2009).
8. A.S. Ackleh and J.J. Thibodeaux, Parameter estimation for a mathematical model of erythropoiesis, *Mathematical Biosciences and Engineering*, 5, 601-616 (2008).
9. A.S. Ackleh, K. Deng, and J.J. Thibodeaux, An explicit finite difference scheme for a structured erythropoiesis model, *Proceedings of the 5<sup>th</sup> International Conference on Dynamical Systems and Applications*, Atlanta, Georgia, May 30-June 2, 2007.
10. A.S. Ackleh, K. Deng, and J.J. Thibodeaux, A monotone approximation for a hierarchical size-structured model with a generalized environment, *Journal of Biological Dynamics*, 1, 305-319, (2007).
11. A.S. Ackleh, K. Deng, and J.J. Thibodeaux, A structured erythropoiesis model with nonlinear cell maturation velocity and hormone decay rate, *Mathematical Biosciences*, 204, 21-48 (2006).
12. J.J. Thibodeaux, Congruences modulo a product of primes, *Pi Mu Epsilon*, 11, 499-500 (2003).

### Conference Presentations

1. A second-order finite difference approximation for a mathematical model of erythropoiesis, Joint AMS-MAA meeting, Boston, MA, January 4-7, 2012.

2. Optimal treatment strategies for malaria infection, 8<sup>th</sup> European Conference on Mathematical and Theoretical Biology, Krakow, Poland, June 28-July 2, 2011.
3. Optimal treatment strategies for malaria infection, Third Conference of the Euro-American Consortium for Promoting the Application of Mathematics in Technical and Natural Sciences, Albena, Bulgaria, June 20-25, 2011 (Invited).
4. Optimal treatment strategies for malaria infection, Joint AMS-MAA meeting, New Orleans, LA, January 6-9, 2011.
5. Optimal treatment strategies for malaria infection, UL Lafayette colloquium, Lafayette, LA, October 28, 2010.
6. Seeking optimal treatment strategies for malaria infection, Joint AMS-MAA meeting, San Francisco, CA, January 13-16, 2010 (Special session on biomathematics), (Invited).
7. Seeking optimal treatment strategies for malaria infection, Annual Meeting of the Society for Mathematical Biology, University of British Columbia, Vancouver, B.C., Canada, July 27-30, 2009, (Special session on malaria modeling), (invited).
8. A mathematical model of erythropoiesis subject to malaria infection, First Conference of the Euro-American Consortium for Promoting the Application of Mathematics in Technical and Natural Sciences, Albena, Bulgaria, June 22-27, 2009 (Invited).
9. Modeling erythropoiesis subject to malaria infection, Joint AMS-MAA meeting, Washington D.C., January 5-9, 2009.
10. Parameter estimation for a mathematical model of erythropoiesis, Joint AMS-MAA meeting, San Diego, CA, January 6-9, 2008.
11. Size-structured population models and their application to erythropoiesis, Workshop on Control Theory and Mathematical Biology, Louisiana State University, July 26-27, 2007.
12. A monotone approximation for a hierarchical size-structured model with a generalized environment, Joint AMS-MAA meeting, New Orleans, LA, January 5-8, 2007.
13. A structured erythropoiesis model with nonlinear cell maturation velocity and hormone decay rate, Annual meeting of the MAA, Louisiana/Mississippi Section, February 16-18, 2006.

14. A structured erythropoiesis model with nonlinear cell maturation velocity and hormone decay rate, Joint AMS-MAA meeting, San Antonio, TX, January 12-15, 2006.

---

## Service

---

Reviewed research articles for Natural Resource Modeling, The Bulletin of Mathematical Biology, and the Journal of Mathematical Biology.

Research presentation to Pi Mu Epsilon Math Club

Chair of the departmental committee to revise its T122 common curriculum course.

Member of the college curriculum committee

Advisor of 3 students.

Worked with students in preparation for the Putnam competition ( 3 in 2011 and 4 in 2012).
